South Platte Renew 6th Annual River Clean-Up Event Sponsor Opportunities

South Platte Renew (SPR) is pleased to offer sponsorship opportunities to support the 6th annual River Clean-Up event in 2023.

The 2022 event was a resounding success, with 290 community participants and 300 bags of trash and recycling collected.

The 2023 River Clean-Up goal is to collect more than 275 bags of trash and increase community and team participation by introducing a second clean-up location in Littleton, CO.

Lending your support as a sponsor to the 2023 SPR River Clean-Up will help us expand the event to more communities while offering participants giveaways and the opportunity to learn more about the South Platte River, the environment, and renewable resources in celebration of Earth Day.

About South Platte Renew

South Platte Renew (SPR) is passionate about renewing natural resources for Colorado's future. Renewed water is returned to the South Platte River watershed to support thriving aquatic and riparian ecosystems, recreation, downstream agriculture, drinking water, and storage.

Co-owned by the Cities of Littleton and Englewood, SPR cleans more than 20 million gallons of water daily and is the third-largest Publicly Owned Treatment Works in Colorado, serving 300,000 people within a 108-square-mile area in the southwest Denver, Colorado region.

Additional resources recovered through the facility's treatment process include renewable natural gas that is cleaned and injected into natural gas pipelines and biosolids that are land applied as a soil amendment to farmland owned by the Cities.

Through the organization's mission and vision, SPR understands the importance of stewardship and conservation to protect Colorado's most precious resource, water. SPR accomplishes this through the water renewal processes, education, outreach, industry organizations advocacy, and a commitment to the environment and the communities the facility serves.
